## Who we are

We are a manufacturer of inflatable boats, based in St. Petersburg, Russia. Our history started with a hobby of our business owner long time ago, who turned the hobby into a profession and a business, back in 2009. Since then through hard work and commitment we have grown to become a well-established export-oriented company with sales geography including not only our local market of Russia, but also CIS countries, Scandinavia, Europe and Middle East.

## What we do

Our mission is to produce and supply to people high-quality affordable products to promote and popularize healthy life-style, outdoor activities, and family-oriented occupation. We know how to produce good boats and we want to share with people results of our hard work.

We specialize in design, development and series production of inflatable boats. Our product range covers all possible purposes that inflatable boats are used for: sport, fishing, hunting, recreation, work. We manufacture all possible sizes, starting from the smallest fun-for-one yacht tender to a big professional boat used in a professional field. Our series of inflatable boats include:

**Sport series** **Classic series** **Yacht tenders and dinghies** **Seaworthy** **Row boats**

Each series offers a range of boats of optimal sizes and weights fit for the purpose and developed with Clients preferences taken into account. If you are looking for an inflatable boat you will surely find it in our product range to your taste and suitable for the purpose. If not, then we will develop it for you. Open to tailor-made solutions, we produce individual designs.

## Why choose admiral

**The main value is our Clients who drive our desire for constant innovations, improvement of goods and quality and customer service.**

**We adopt the design to comply with customer desires and respond to a local demand**

**We are using only top grade materials**

**Each model is CE-certified**

**Best logistic service: sea freight, air shipment, delivery by truck**

**All our products are hand-made**

**Flexible approach to our Clients and Partners**

ADMIRAL

Admiral quality

Quality is essential! in every product, for every person who makes a purchase. A desire to have a reliable product that will last long and will not let you down at the most critical moment is always there.

Here at Admiral it is our objective to save our Clients from problems related to quality. That is why we try to reduce risks of any failure in material or craftsmanship during production, perfecting our quality control system on the regular basis.

What makes Admiral Quality?

### **Sustainable materials**

We purchase materials from reputable suppliers well-known in the industry for their research and developments of products specifically intended for the boating business. We keep up with the latest improvements and innovations introduced by the boating industry suppliers.

### **Professional, committed team**

We have the best specialists working at the Admiral Company, some of us have been making boats all our lives and we love it. Indeed we are passionate about what we do and want to share our products with people.

### **Well-proven technologies**

We produce our boats in accordance with the latest developments and well-reputed technologies applied in the business. We constantly keep looking for novices in the materials market and search to implement innovative technologies in our production and quality control process.

### **Sustainable quality control**

We inspect, check and test materials quality on the regular basis prior, during and after production. The products are controlled on each production stage to keep up with quality standards we set for Admiral boats. Our quality control system includes:

- Material inspection;
- Glue adhesion and temperature tests;
- Pressure testing;
- Components stress tests;
- Seams tests;
- Final 24 hours inflation pressure test.

### **Certification.**

All our boats are certified with Polski Rejestr Statkow S.A. and carry a CE-mark accordingly to prove the quality we offer.

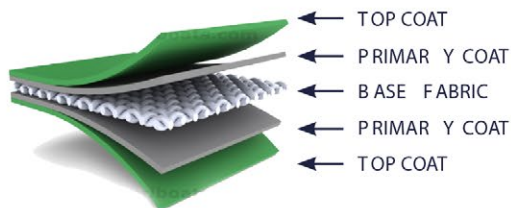

## Boat material

Unique high quality PVC coated special fabric, manufactured in Germany under the internationally recognized standard of quality DIN EN ISO 9001: 2008. Several layers of PVC are combined with a Polyester base fabric of high strength 1100 dtex yarn by melt-roller coating. These single layers give flexibility, elasticity, airtightness and resistance against mechanical damage.

UV and weather resistant;  
Air and watertight;  
Temperature resistant to hot and cold conditions  
Wearproof and dirt-repellent surface

VALMEX® boat is abrasion resistant, UV and weather resistant, and insensitive to high temperature conditions. VALMEX® plus products feature higher resistances to various environmental conditions due to an additional acrylic surface finish.

Made in Germany.

## Glue

TEXACOL M 100 PU.PVC - one or two component adhesive purposely designed for gluing synthetic materials: polyurethane and PVC. With its good initial tack characteristics this glue is extensively used in the boating industry.

Highly resistant to hydrolysis;  
Excellent thermo resistance;  
Strong durable seams;

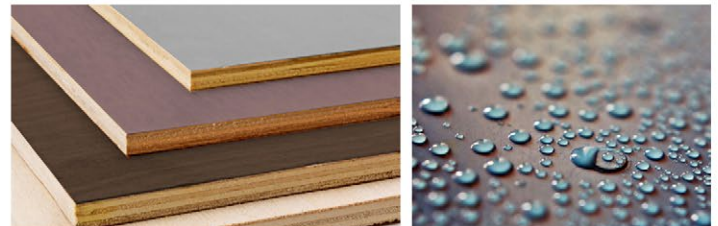

Made in Italy.

## Marine grade plywood

BS 1088 is a standard that is used by marine plywood manufacturers worldwide. For the floor, seats and transom we use plywood with a waterproof lamination specifically designed for boats and yachts. Marine grade plywood has no internal voids, and features consistent veneer thickness. Particular timber types with good life in a wet environment are normally specified for the marine grade plywood.

YAMAHA

Perfect ratio and speed

# SPORT SERIES

When it comes to a high-speed ride, go for Admiral Sport series: a perfect affordable alternative to costly options like fiber glass. Presented in 4 sizes, the series offers optimal ratio of size and weight, providing perfect hydrodynamic characteristics.

The Sport series boats are our best sellers. It is a result of hard work of our designers and technical team. The main advantage of this model is perfect proportions achieved through expert design and worked-out after many rounds of tests.

With its narrowed bow, the keel perfectly tensing the bottom, and thanks to the hull configuration the model is rapid and fast, meeting minimum water resistance, and stable and safe even when cruising in big water basins. The balanced design of the sport series boats will ensure best performance of your outboard motor.

 ADMIRAL  
Classic is classic

# CLASSIC SERIES

This model was inspired by desire to design a spacious, yet mobile and maneuverable, compact boat.

It is classic: stable, well-thought, responsive and maneuverable. This model is especially popular among hunters and fishermen. Wide enough it allows you to use efficiently boat space and go long distance with comfort.

Durable, safe and reliable Classic series boats will be your partner during many rounds of family trips, long distance tours, and fishing or hunting fun with friends, through many years of trouble-free use.

We offer a lux modification for your classic series boat. Lux modification includes a tent and a set of soft seats complete with a bag.

# YACHT TENDERS AND DINGHIES

If you absolutely adore water activities: fishing, diving, snorkeling, waterskiing or just having fun on water with kids, family and friends you will surely find the proper use for our foldable inflatable tenders.

They are so compact and quick and easy to assemble and disassemble, that it will be fun just packing and unpacking.

No problems with storing, no worries of keeping it in shape. You need it, just take it out, you do not need it, just fold it back.

Our yacht tenders and dinghies range includes boats from a tiny AM-180, fun for one model, to a bigger AM-270, which has a carrying capacity of 450 kg and capability to accommodate 4 persons, and is still portable. The range offers various sizes and various capacities for every purpose.

ADMIRAL

Perfect ratio and speed

# ADMIRAL SEAWORTHY SERIES

The seaworthy series offers high-quality well-built boats designed for the professional use. It is a favorite choice of professional hunters and fishermen for its spacious cockpit, allowing for travelling long distances in comfort with all the hunting and fishing gear. These boats are designed for the hard use and rough conditions: increased sized of tubes, additional transom and keelson reinforcement, thicker wooden floors and a thicker boat material.

For this series as the loads increase, we designed a custom-tailored profile to fit the floor girder which properly fixes the flooring set especially when riding the waves, or sailing in rough conditions.

# ACCESSORIES

## Life jackets

Be safe

No worries of safety when you wear Admiral life jackets: belts for secure fit, quick release buckle, bright colors, durable material and a whistle which comes with every life jacket.

Due to its right design and cut, it will not hinder your movements allowing you to move freely regardless of what you do.

You will feel you wear it only because it keeps you warm and protects from wind.  
All sizes, any color.

## Inflatable furniture and soft seats

Be comfortable

Stylish wooden and nicely done seat benches, made of durable material, they serve their purpose well, but for a couple of hours of travelling to a point of destination and during a speed ride fun.

If you want to enjoy your cruising, lounge in your boat enjoying picturesque surroundings, or if you are happy to sit in your inflatable boat waiting for hours for a biggest bite of your life, you better choose something more convenient. Sitting in an Admiral inflatable sofa you can make yourself comfortable, with your back relaxed leaning against sofa.

It is comfortable to sit on a cushion in any part of the boat leaning on its side.

We offer a range of furniture to equip your boat:

- Cushions and paddles
- Sofas
- Softs seats
- Cushions and furniture are made of durable PVC material.

- Individual sizes and colors exactly matching your boat.
- No problems with storing, deflated furniture occupies little space.
- Will keep you comfortable every minute of your retreat.
- All fixtures and fittings to install the furniture are included in your standard delivery set coming with the furniture

## **Railings and awnings**

Be professional

Transportation and bow awnings, awning-transformers provide protection of passengers and items from wind and rain, splash of water. It is not only protection that awnings provide but improves aerodynamics and reduce wind resistance. Various designs, with and without windows, mosquito nets, configurations all purposes. Robust structure, reliable fixings. All fixtures and fittings are included.

Admiral Company offers a wide range of railings, strengthening set, everything to tune your boat to your personality.
